Dear Diogo,

My name is Ricardo Reyes-Jiménez, I'm the supervisor of the adaptation of the CNCFlora system to the IAvH requirements. As Carolina mentioned in her previous email, we would like to arrange a meeting with you to discuss a few questions we have about the system. On August 30th, the next Thursday, we have arranged a meeting with all the members of the current development team, and according to the schedule you sent us, I would like to propose a videoconference from 11am to 12m (Colombia) that day, would this be possible for you?

Following your suggestion, I'm also sending you some of the questions to have a starting point:

1. Which are the access URI's to the web-services CLI of CNCFlora & FLORATA, and where we can read the documentation for those services?
2. After the stand-alone deployment we have no access to all the administration privileges. How is possible to run the administration of all categories and possible configurations of CNCFlora?
3. How we can edit the information components of taxonomic data?

On August 30th, the next thursday, we have arranged a meeting with all the components of the current development. Im kindly asking You if you have availability to join a videoconference from 11am to 12m (Colombia) that day?

Thank you so much in advance, and Im so grateful for your attention.

Ricardo Reyes-Jiménez
